

January 20, 1961

Mr. M. Clark Felch
Chairman, Pot Creek Water Users Association
Vernal, Utah

Dear Mr. Felch:

RE: POT CREEK DISTRIBUTION

We are at present planning our distribution program for 1961. With the approval of your group, we will proceed along the same lines as of last year with one exception. Based on our experience last year it will be necessary to increase assessments a small amount to meet the needs during 1961.

As you will recall, the budget for 1960 was set for a total of \$425.00. Due to the dry year and the difficulty encountered in distribution of water among the users, we had to over-expend this budget. This year, we feel it will be necessary to set a total budget of \$600.00 if we are to get a commissioner who can do the job.

With a group no larger than the Pot Creek Water Users, we feel perhaps it will not be necessary to hold a formal meeting with the users. We would like to proceed to appoint the commissioner on Brush Creek as Pot Creek commissioner and assess the proposed budget. We can see little to be gained by calling all people into a meeting and getting into a long haggle over whether distribution is necessary and the costs involved.

We might suggest that you may wish to call your users together for a meeting and advise us of their reaction. We feel that distribution is still necessary on the Creek. We hope to continue to enjoy the excellent relationships with the majority of the Pot Creek users that we have had in the past. Should you feel it desirable that we meet with you, we will be glad to do so. If it is not necessary, then we would just as soon handle it by correspondence.

Very truly yours,

DCH/ek/cca

Wayne D. Griddle
